CRITICOM MONITORING SERVICES MOVES INTO NEW MULTIMILLION-DOLLAR MONITORING AND DEALER SUPPORT FACILITY

Center Offers Advanced Services to Help Alarm Dealers Compete

LONGWOOD, Fla. – Jan. 10, 2008 – The combined wholesale monitoring operations of CMS and Criticom International, the largest provider of wholesale monitoring and related services to alarm dealers and installers across the country, announced today that upgrades to its new monitoring and support center in Cypress, Calif., are complete and the company now operates from the new facility. The company, which operates under the name Criticom Monitoring Services (CMS), has invested more than \$2.5 million in the 14,000-square-foot facility. The new center offers state-of-the-art computer and telecommunications systems as well as additional and advanced services for its dealers.

The new center, which replaces the company's old facility located in nearby Irvine, Calif., is UL listed, offers dual generators and UPS backup, and has multiple telecommunications carriers, helping to ensure continuous and reliable service. In addition, the company's more than 140 veteran operators, dealer support personnel and IT professionals who worked at the Irvine facility have continued their roles at the new center.

"We are excited to have the first large-scale upgrade and facility enhancement completed since our merger was announced. This upgrade was completed and all future enhancements will begin with the goal in mind of delivering more to our dealers and helping them to compete aggressively as providers who offer technologically advanced and specialized monitoring," said Tony Wilson, CMS president. "Overall, this new west coast facility complements our existing centers, especially our large Florida-based central station, where we currently offer online access to accounts, quality assurance programs, MASTerMind™ technology, enhanced redundancy™ and much more."

In addition to the new Cypress facility, the company also has monitoring facilities in Longwood, Fla., Manasquan, N.J., and St. Paul, Minn.

CMS and Criticom International constitute the largest wholesale monitoring company in the United States, providing wholesale alarm monitoring for high-end installers and providers of intrusion, environmental and life safety security products and services to residential, commercial, medical and industrial customers. The company also provides dealer integration, support and development services. Its well known brands of companies include King Central[®], Monital[®], NACC[™], and Securion[®].
